Additional information

MY ACTIVITIES

Main objective: explore the interplay of several factors on cancer patients' preferences for foods belonging to the Mediterranean diet.

Specific objectives of the project:

- Provide a better understanding of food perception, mainly taste and smell sensations in the mouth, and food preferences in cancer patients under treatment.
- Develop and test innovative food products in the context of Mediterranean diet tailored to the preferences of patients affected by cancer undergoing treatment considering their individual differences.

MY THESIS IN KEY WORDS

Food preferences, Sensory-hedonic responses, Personality Traits, Mediterranean Diet, Cancer patients, sensory perception
