- 2018 - 2021 : Master Degree in Philosophical Sciences, University of Milan
- 2016 - 2018 : Bachelor Degree in Philosophy, University of Milan

Additional information

MY ACTIVITIES

Main objective: taking advantage of the link between higher proficiency in categorization tasks and lower food rejection rates to develop solutions to food rejection in three- to six-years-old children.

Specific objectives of the project:

- To provide a model for children's naive food ontology.
- To clarify the nature of children's food rejection.
- To bridge the both the theoretical gaps between psychological and philosophical literature, as well as the gaps between scholars' and children's food categories.
